Introduction

Shoper 9 provides an IRN generation utility, which will export and register all business-to-business (B2B) transactions on Invoice Registration Portal.

If you have had an annual turnover more than Rs. 100 Crores during the financial year 2019-20, you need to generate Invoice Registration Number (IRN) for your supplies/sales. In effect you need to generate IRN for all your Sales Invoices, Debit Notes, and Credit Notes for local, interstate, and export transactions.

For this, you need to upload the complete invoice details to the e-Invoice portal. The system will generate the IRN and return the Signed QR Code. You need to print the IRN, ACK No., Date and QR Code on the invoice issued to the buyers.

Prerequisites

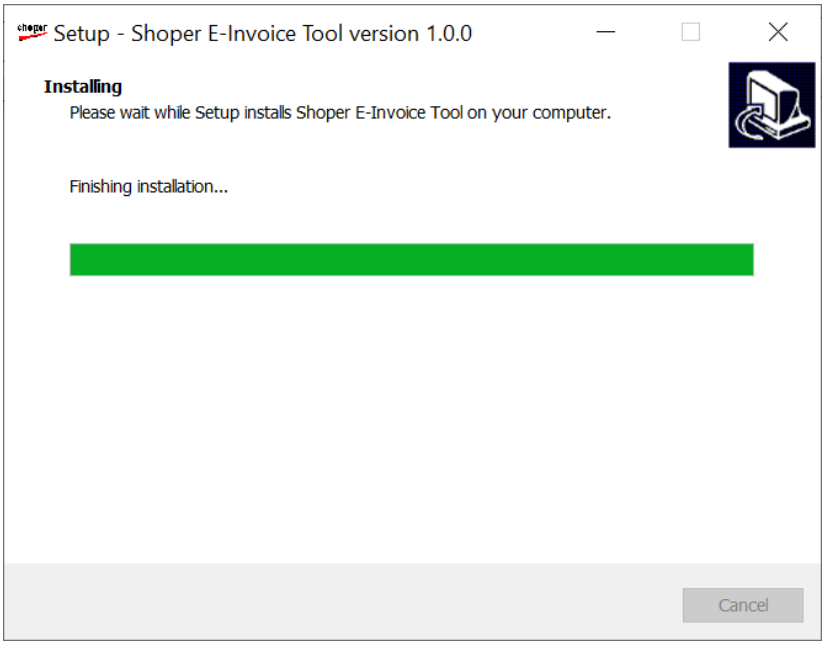
Product	Minimum Requirement
Shoper 9 POS	Release 2.23 or later with Shoper GST patch
Dot Net Framework	4.5

***Note**: Take backup of all Shoper 9 Companies before you install the patch.*

Implement the Patch at Independent Stores

Update Patch on Standalone or Server Computer

1. Download **Shoper_E-Invoice_Tool.exe** from the Tally website.
    a. Open https://tallysolutions.com/download/support-files/
    b. Click **Tally.Shoper 9**.
    c. Under Shoper 9 Add-Ons, select **Shoper 9 E-Invoice**.
2. Right-click **Shoper_E-Invoice_Tool.exe** and select **Run as administrator**.



The installation wizard will close once the installation is completed.

In case the patch is updated on the server computer, you need not update on the client computers.

Implement the Patch at Chain Stores

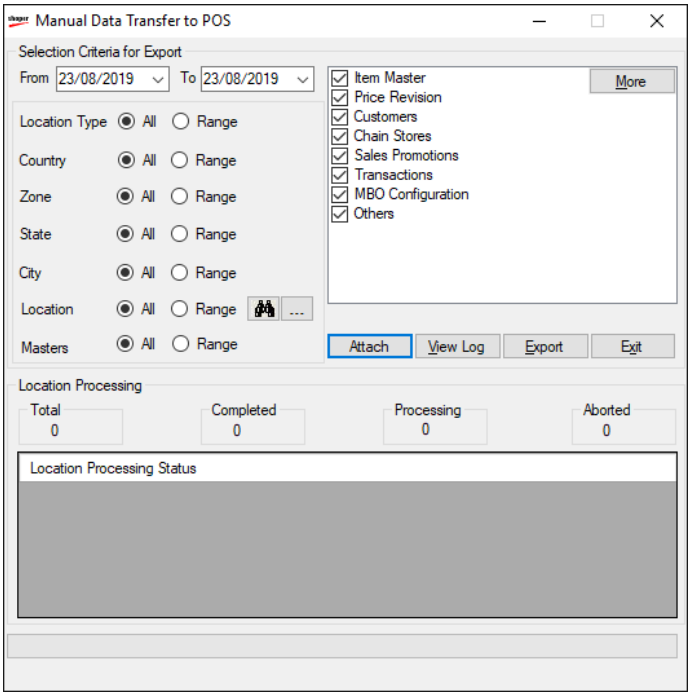
Shoper 9 HO data export has the capability to attach additional files and instruct synchronisation program to execute the attached file during synchronisation at POS. This feature is disabled by default. You need to enable it in the System Parameters.

Enable Attaching Additional Files Feature

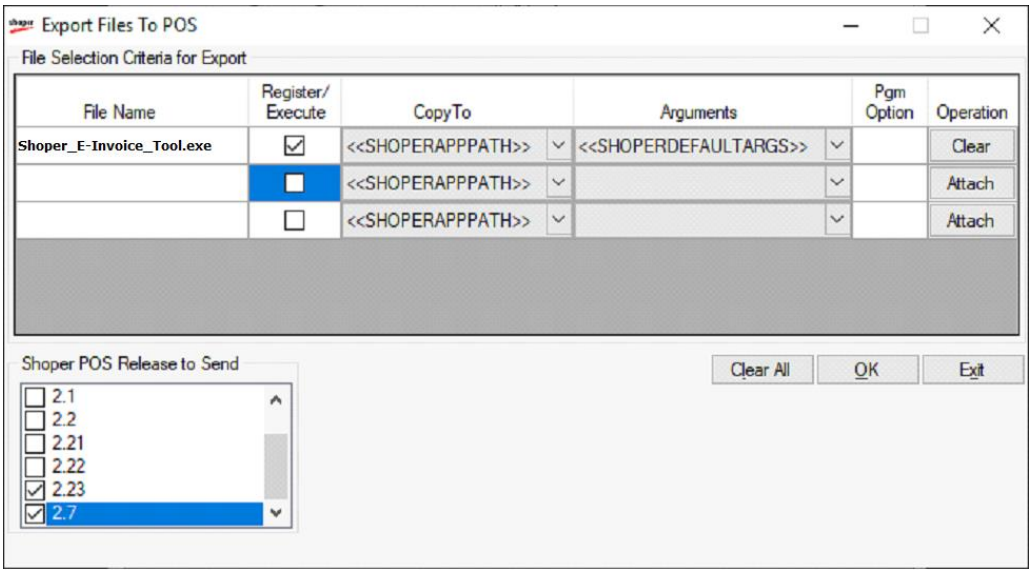
1. Go to **Shoper 9 HO** > **Housekeeping** > **Reconfiguring System Parameters** > **Data sync**.
2. Enable the parameter **Enable attaching additional files to export to POS locations**.
3. Click **Save**, and then click **Apply to Database**.

Attach File During Data Export at HO

1. Copy the **Shoper_E-Invoice_Installer.exe** to Shoper 9 HO application folder.
2. Go to **Data Sync** > **Exports** > **Master data to POS** > select the showrooms.



3. Click **Attach**.



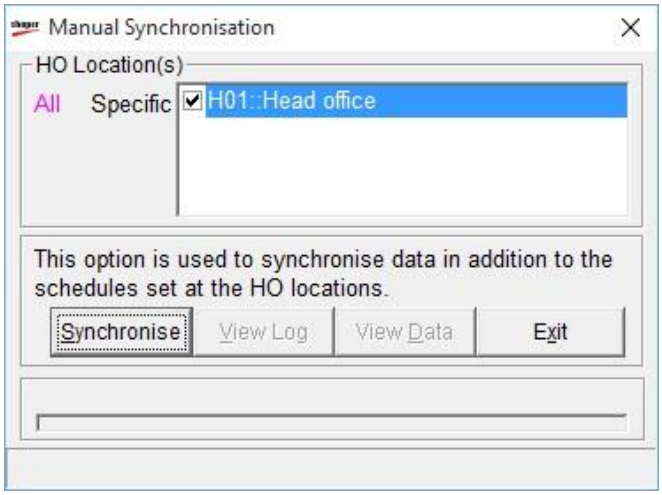
4. Type the file name **Shoper_E-Invoice_Tool.exe**.
5. Select the **Register/Execute** option.
6. Select Release 2.23 and later versions in the **Shoper POS Release to Send** section.
7. Click **OK**, and then click **Export** to send the data.

Synchronisation at POS

In case you have scheduled synchronisation, the patch is installed during the next schedule. Otherwise, manual synchronisation is required.

To synchronise manually:

1. Go to **Shoper 9 POS** > **Housekeeping** > **Synchronisation** > **Synchronise Manually**.



2. Click **Synchronise**.

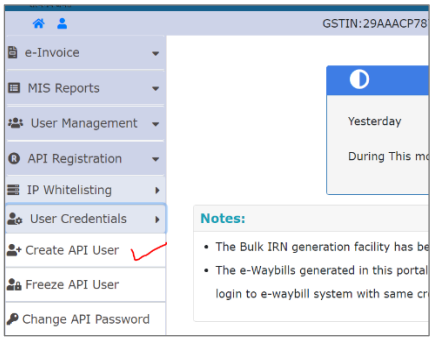
Data is imported as part of synchronisation, and the patch is updated automatically.

API User Creation

To generate IRNs online, API user needs to be created in the e-Invoice portal. The steps to create API users are given below.

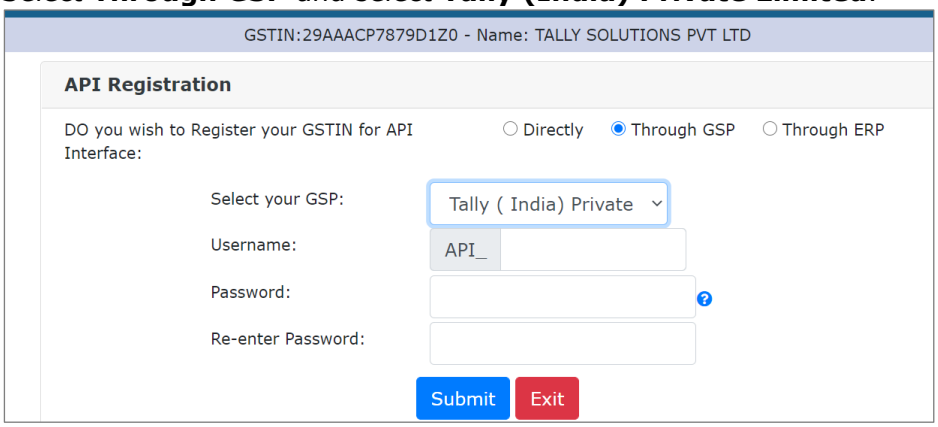
1. Login to the e-Invoice portal https://einvoice1.gst.gov.in/ by entering the user name & password.

2. On the left pane, select **API Registration** > **User Credentials** > **Create API User**.



3. Enter the OTP which is sent to the registered mobile number.
   The API registration screen will open when the OTP entry is successful.

4. Select **Through GSP** and select **Tally (India) Private Limited**.



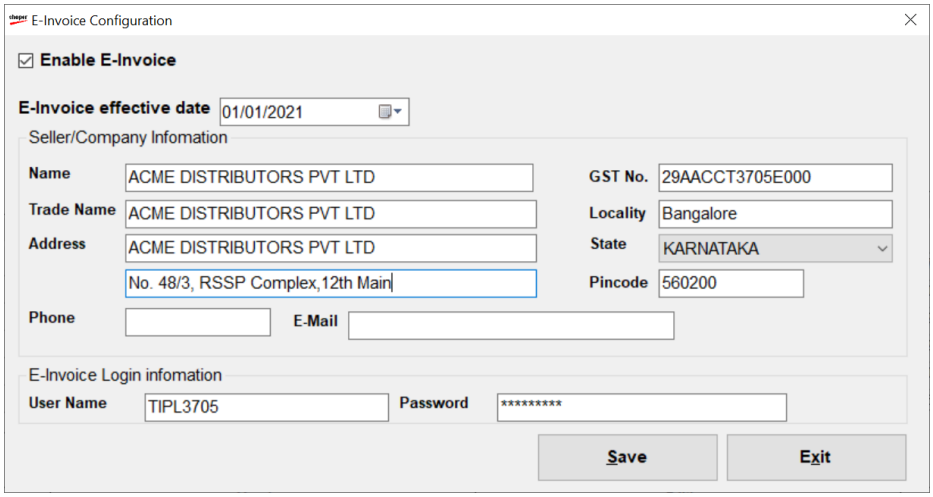
5. Create the username and password.
   These credentials can be used for API access through the GSP.

Once created, use these API credentials in the e-Invoice configuration screen to generate/cancel IRN online from Shoper 9.

E-Invoice Configuration

Configuring e-Invoice is a one-time activity. You need to capture the supplier details required to generate IRN for the invoice in the **E-Invoice Configuration** screen.

1. Go to **Setup** > **General** > **E-Invoice Configuration**.



2. Select **Enable E-Invoice** to generate IRN during transaction based on the effective date.
3. In **E-Invoice effective date**, enter the date from when invoice registration is applicable.
4. In **Name**, enter the Shoper 9 Company name.

5. In **Trade Name**, enter the business name registered with GSTIN.
6. In **Address**, enter your business address.
7. In **GST No.**, enter your GSTIN.
8. In **Locality**, enter your city/location.
9. In **State**, select the state where your business runs. The GSTIN specified in GST No. should belong to the state selected.
10. In **Pincode**, enter the pincode of your business address.

    Note: *Step #2 to step #10 are mandatory.*
11. In **Phone**, enter your phone number.
12. In **E-Mail**, enter your business e-mail ID.

    GSTIN may use this e-mail ID to send notifications when invoices are registered.
13. In **User Name**, enter the **API User Name** linked to the GSP, **Tally India Private Limited**.
14. In **Password**, enter the password for the above user.

    Note: *Step #13 to step #14 are mandatory for generating/registering invoice online.*

The details configured here will be used when generating e-Invoice.

IRN Generation

During Transaction

1. Ensure that **Enable E-Invoice** is selected in the E-Invoice Configuration screen.
2. On completing the transactions, IRN will be generated.

   IRN generation happens before printing the invoice.

After generating IRN, the IRN, Ack No., Ack Date, and QR Code are saved in Shoper 9.

Multiple IRN Generation Online

When you have many invoices, generating invoices one-by-one will be cumbersome and time-consuming. Shoper 9 provides a utility to generate IRNs for all B2B transactions together.

1. Go to **Sales** > **E-Invoice IRN generation**.

6. Select **From Date** and **To Date**.
7. Select the transaction types.
8. Click **View**.
9. Select the transactions for which you want to generate IRN.
10. Click **Generate IRN**.

The invoice details are sent to the IRN portal, and the response will be received.

The response file will contain Ack No., Ack Date, IRN, SignedQRCode and Signed Invoice for all the successful cases. These details will be filled in the screen. You can print invoices with the details – either one-by-one or in bulk from sales transaction, or one-by-one from transfer out transaction.

If IRN generation fails for any invoice, the corresponding messages will be displayed on the portal.

Multiple IRN Generation Offline

This is a two-step process – export the invoices and upload to the portal, and import the responses to Shoper 9.

Data Export

You can use the **Export** option to export the data to a json file and upload to the e-Invoice portal directly.

1. Go to **Sales** > **E-Invoice IRN generation**.
2. Click **Export**.
   Exported data will be saved in **<<Shoper application folder>>\e_invoice_json\Out**.
3. After exporting the data, logon to the portal **https://einvoice1.gst.gov.in**.
4. Upload the JSON file created.
5. Download the response file from the portal, to a folder of your choice.

The response file will contain Ack No., Ack Date, IRN, SignedQRCode and Signed Invoice for all the successful cases. These details will be filled in the screen. You need to import the response file to Shoper 9.

Response Import to Shoper 9

You need to import the response file generated by the IRN portal. This is needed to print the mandatory SignedQRCode on the invoice.

- Go to **Sales** > **E-Invoice Response Import**.

  Select the response file in zip format, to import all the Signed Invoices available in zip file.

The SignedQRCodes will be assigned to the corresponding invoices. You can print invoices with the details – either one-by-one or in bulk from sales transaction, or one-by-one from transfer out transaction.

If IRN generation fails for any invoice, the corresponding messages will be displayed on the portal.

Cancel IRN

You may need to cancel IRN if the e-Way Bill is not generated, or an e-Way Bill generated is cancelled later.

1. Go to **Sales** > **E-Invoice IRN generation**.
2. Select **From Date** and **To Date**.
3. Select the transaction types.
4. Select status **IRN Generated**.
5. Click **View**.
6. Select the transactions for which you want to cancel IRN.
7. Click **Cancel IRN**.

The IRN will be cancelled on the portal, and the response will be loaded in Shoper 9. The status of the cancelled invoices will be updated as **Cancelled**.

Note: *In the e-Invoice portal there is a facility to cancel the IRN if active e-Way Bill is not there.*

Document Printing Formats

Template-based printing

There are default templates to print the mandatory fields and Signed QR Codes.

- **E-Invoice.spt** – To print documents in A5-Landscape.
- **QRCODE-Shoper40ColPOS** – For 40 Column POS printing.

Tax Invoice

QRCodes printing in custom templates

You can use different custom templates for printing.

Old templates (TPL, VPL, IPL)

Include the word **QRCode** in TPL file in a separate line. This will be replaced with the QR Code Image.

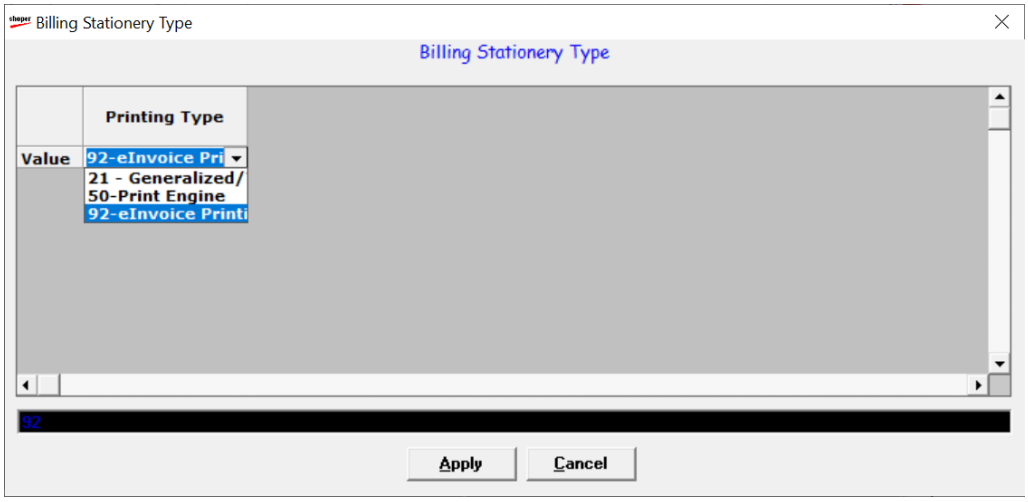
SPT templates

Include the image **EInvQR.bmp** in the folder **billtemplates\images**. The Signed QR Code will be printed.

Standard printing format

Standard format with support for printing QR Code is provided. You can enable this for Sales, Sales Returns, Goods Inwards, and Goods Outwards.

- For billing you need to set Billing stationery type as **92-eInvoice** Printing.
- For Purchase Returns and Transfer Out, it is set by default.



A sample invoice is shown below.

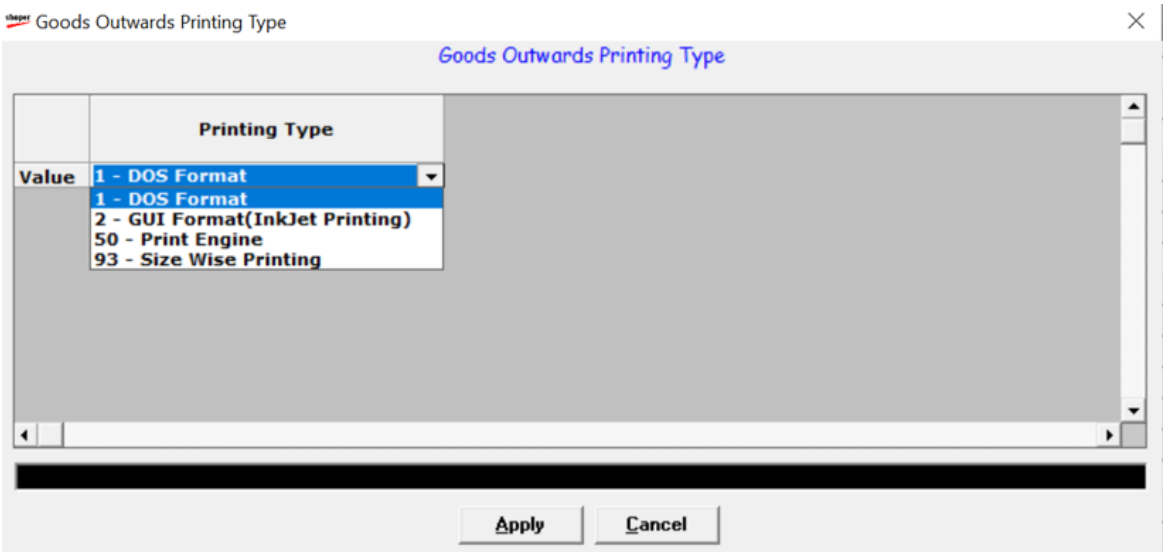
Size-wise printing

- Set the printing type as **93 – Size Wise Printing**.



Errors & Resolutions

Address-related Errors

- The Address 1 field is required
- The field Address 1 must be a string with minimum length 3 and maximum length 100
- The Location field is required
- Pincode does not exist
- The field Pincode must be between 100000 and 999999

Solution

Ensure that the correct Address, Location name, Pincode, State name are entered in the Customer Catalogue, Vendor Catalogue, and Chainstores Catalogue.

Item Master-related errors

The field Barcode must be a string with minimum length 3 and maximum length 30.

Solution

Ensure that all Stock Numbers should have length between 3 and 30.

HSN-related issue

- Invalid HSN codes
- The field HSN Code must be a string with minimum length 4 and maximum length 8
- The HSN 62129090 does not belong to service

Solution

Ensure that the correct HSN Codes are maintained in Item Master.

Transaction

- You have exceeded the limit of number of items.

Solution

Limit the number of items to 1000 in billing.

Tax Rate

- Invalid SGST and CGST Amounts for HSN - 62064000 and Sl No. 1.

Solution

1. Note down the Item Number for which this HSN code is linked (based on the serial number mentioned)
2. Verify the HSN Code
   Correct the HSN code if wrongly specified
   a. If tax percentage is correct for the specified HSN Code, then export the data again
   b. Else go to step 3
3. Note down the **Product Tax Type** mentioned for this item in Item Master catalogue
4. Edit the Tax catalogue and correct the tax percentage for the noted **Product Tax Type**
5. Void the invoice and re-generate the bill

Note: *You can also use the Tax Re-computation utility to re-compute the tax based on the new rate.*
